

REMARKS

By this amendment, in conjunction with a discussion between Examiner and Applicant's counsel, Applicant now makes some additional changes to the claims in order to place this application in condition for allowance. Specifically, Applicant now amends Claims 39, 43, 65, 72, 73, 75 and 76 in the manner suggested by the Examiner. Claim 48 is also being canceled without prejudice. The present set of claims overcome all previous prior art rejections for the reasons as set forth in Applicant's response with attachments submitted on January 11, 2011. In particular, Applicant pointed out that the additional ingredients in the cited prior art would act in a manner that would counter the benefits of Applicant's claimed invention and would materially change those characteristics.

Accordingly, in light of the above amendments and the discussion with the Examiner, Applicant submits that the application overcomes any remaining objections and has been placed in condition for immediate allowance. Such action is respectfully requested.

Respectfully submitted,

Date: April 7, 2011
